The information in this booklet was finalized July 19, 2024. Any changes to the dates and/or locations of TCOE student events will be posted at tcoe.org/StudentEvents. You are encouraged to check this webpage for updates on contacts, coaches' meetings, deadlines, and registration information.

TCOE Student Events and the California State Standards

TCOE has always promoted student event participation as an avenue to providing a well-rounded educational experience. Now, we are able to further emphasize the importance of student events by directly aligning them to our 21st century standards. These focused and rigorous standards define the knowledge and skills students need for success in college and career. The standards call for an integrated curriculum that challenges students to think in complex ways and to apply the knowledge and skills they have acquired. Evidence of such learning can be demonstrated through the completion of a variety of assigned tasks, including TCOE Student *Future Ready* Events.

When applicable, TCOE Student *Future Ready* Events are coded in one or both of the following manners:

- Alignment to the College and Career Readiness (CCR) Anchor Standards, Mathematical Practices (MP), Science and Engineering Practices (SEP) in the Next Generation Science Standards (NGSS) and/or Artistic Processes in the California Arts Standards (CAS). Refer to the back of this booklet for CCR Anchor Standards, Mathematical Practices, Science and Engineering Practices and Artistic Processes in their entirety.
- Identification of the type of task associated with the event
 - Presentation: information is orally conveyed
 - Performance: a dramatic interpretation is included
 - Project: a product is produced prior to the day of the event
 - Problem Solving: a recommendation or solution is provided

Scan the QR code to find more information on the anchor standards referenced in this brochure.
