Assessing in a Thinking Classroom

BTC Toolkit 4

This session is built for educators already using BTC practices from Toolkits 1, 2, and 3 in their classrooms.

You've Built Your Thinking Classroom.

Tasks are launched standing and verbally.
Groups are visibly randomized at whiteboards.
Only keep thinking questions are answered.
Knowledge is mobilized; the room is defronted.
1/3 of your daily lesson is devoted to closure.

Facilitated by:
Chelsea McClellan

Now How Do You Assess It All?

Join us for an interactive, deep-dive workshop focused exclusively on Toolkit 4 from Peter Liljedahl's *Building Thinking Classrooms in Mathematics*. Let's shift our students from collective knowing and doing to individual understanding that *sticks*.

Why Attend?

- Engage in a math task from Launch to Closure
- Discover what is assessable and why formative is a verb not a noun
- Learn how to build and place navigation tools into the hands of those who take the action - your students
- Become a hunter, not a gatherer. Use data that represents the truth about what your students have learned.
