Tim A. Hire, County Superintendent of Schools

Mathematical Language Routines

**Essential for Some, Beneficial for All:
Develop Mathematical Language and Content for English Learners**

The Mathematical Language Routines (MLRs) foster language development alongside mathematics learning. Come learn how to design a language-rich mathematics environment incorporating integrated ELD, where there is space for all students to participate.

Invite students to:

- Make sense of the mathematics
- Communicate and reason about mathematical concepts
- Revise and refine the way they organize and communicate their own ideas
- Ask questions to clarify their understanding of others' ideas

This session is perfect for those who are interested in meeting the needs of linguistically-and culturally-diverse students who are simultaneously learning mathematics while acquiring English.
