Tim A. Hire, County Superintendent of Schools

Building Confidence in Multiplication and Division

Come along as we delve into the shift from additive thinking to multiplication and division for students. Equip yourself with the tools needed to help students enhance their understanding and fluency. This hands-on workshop is specifically designed to boost the confidence of both educators and students as they navigate a crucial set of standards from 3rd to 5th grade.

Together, we will:

- Examine how multiplication and division develop across the grade levels.
- Investigate strategies to promote both fact fluency and procedural fluency.
- Uncover methods to enrich student comprehension through visual models and manipulatives.
