BYOD: Bring Your Own Device
(laptop or tablet)

FRESNO PACIFIC UNIVERSITY COURSE:
Math Proficiency

Tulare County Office of Education

Tim A. Hire, County Superintendent of Schools

Sensemaking and Student Engagement in Science and Math: The Five Practices

How do you support student sensemaking and engagement?

Shifting instructional practices in science and mathematics is very challenging for any teacher. Key components of sensemaking and student engagement is for both students and teachers to mutually focus on curiosity, challenge and learning.

You will experience a process that helps you decide:

- What aspects of a task to highlight
- How to organize and connect the work of students
- What questions to ask to challenge student thinking
- How to support students to make students' thinking visible
- How to elevate students' voice

Engage in hands-on science and math activities and leave with improved skills and tools to support sensemaking and increase student engagement in your class.
