Dear La Sierra Military Families:

Fentanyl and the opioid crisis have continued to cause great concern in our community.

- Fentanyl, an opioid pain reliever that is 50 times as strong as heroin, is now being manufactured illegally by criminal organizations.
- This “illicit” fentanyl is mixed into street drugs like cocaine and heroin to make them more potent. It is also being pressed into counterfeit (fake) pills that look like prescription medications such as Percocet, Xanax, and Adderall.
- Youth and adults who purchase these drugs through social media or illegitimate online pharmacies may experience an opioid overdose, which can stop their breathing and lead to death.
- Fentanyl is synthetic, that is, it is formed from lab-made chemicals and not from naturally occurring ingredients. This makes the drug cheaper to manufacture and more profitable to sell illegally.
- Another synthetic drug, xylazine, is increasingly being added alongside illicit fentanyl. Xylazine is a strong veterinary tranquilizer. The combined effect of these two drugs on breathing and the heart can be extremely dangerous and further increases the risk of death.

**SIGNS OF AN OPIOID OVERDOSE**

**CALL 911** if you see someone who is:

- Unable to wake up or respond to you
- Breathing slowly or not at all
- Making gurgling, choking, or snoring sounds

First responders can give them the emergency medication naloxone, sometimes referred to by the brand name NARCAN®. When given right away, naloxone can stop opioids from acting on the brain and restore breathing.
